## FOR SALE - GRAVEL COMPANY AND HOLDINGS

# Rickard Excavation Ltd. ASKING PRICE: \$18,000,000

Colliers International is pleased to announce the sale of 100% of the shares of Rickard Excavation Ltd., a single purpose company focused on sand and gravel extraction in the Regional Municipality of Wood Buffalo. Mineral assets include 13 mixed sand and gravel SML's comprising 205.83 hectares within 60 to 90 minutes of Fort McMurray.

Company assets include an open pit with six million tonnes of in-place sellable aggregates with an opportunity to acquire an adjacent SME with two million tonnes of in-place sellable aggregates. CRBP estimates 2.98 million cubic meters of aggregate in the remaining locations.

Road assets include six DLO's with year-round access. Storage assets include three DML's.

Please contact the listing agents below to access additional confidential information.

## Northern Alberta Gravel History

In the past 60 years, the per capita consumption of aggregate materials in Alberta has increased from 3.5 tonnes per year to 12 tonnes annually. In one year, Alberta uses enough aggregate to build a wall around the entire province (3,990 km) measuring 12.5 ft in height and 3 ft in width.

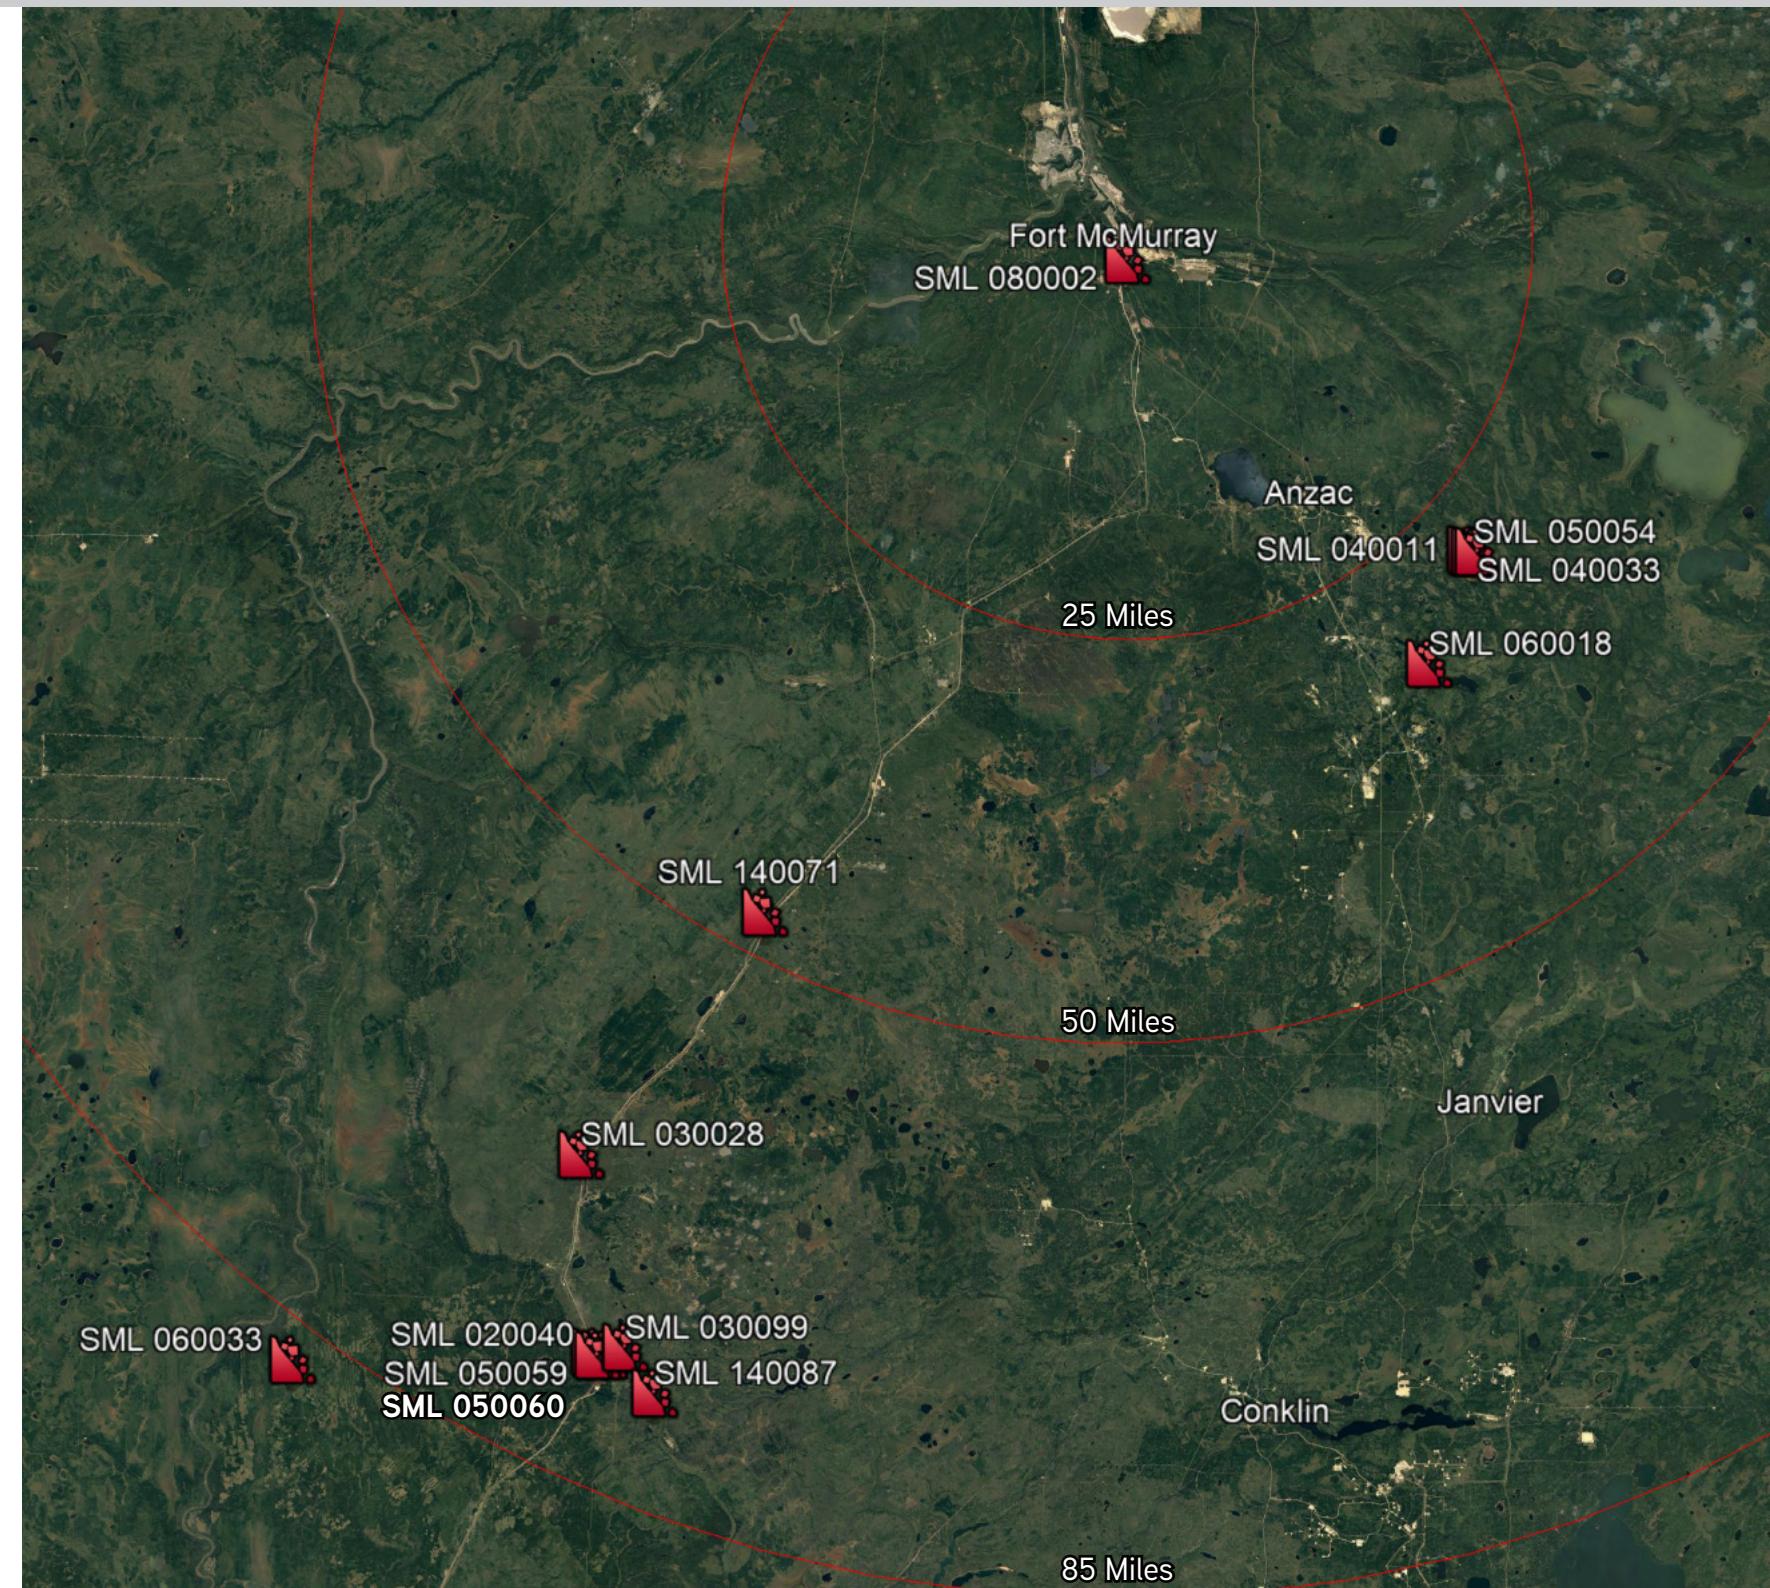

Aggregates demand in northern Alberta was historically serviced by the Susan Lake aggregate operation, a 5,880 acre site that has produced 103.8 million tonnes of sand and gravel since 1998. Susan Lake shuttered in 2018 and has left the region struggling to supply itself with cost-effective aggregate materials. The alternative site - Coffey Lake - is projected to start producing in the second half of 2019. This Crown resource is situated on approximately 1,345 acres of land about 90 km north of Fort McMurray.

The majority of the demand stems from Alberta's extensive oil sands operations, as well as infrastructure requirements in the Wood Buffalo region. Fort McMurray and the surrounding area are positioned with 309.13 acres of commercial land and 291.64 acres of industrial land that are shovel ready, not inclusive of industrial developments on Crown land and First Nation land. This translates to 26% of the commercial land and 22% of the industrial land available for immediate development.
