Corporate Income Tax – Computed at 7.4% of the Idaho taxable income of a corporation. Corporations that are taxable in Idaho and another state or country or are part of a unitary group of corporations, use a 3 factor formula to ascertain how much of the business is conducted in Idaho. The apportionment formula is made up of a property factor, a payroll factor, and a sales factor. These three factors, with the sales factor being double weighted for all taxpayers except for electrical and telephone companies, are totaled and divided by 4 to compute the Idaho apportionment factor. The Idaho apportionment factor is then applied to the business income of the corporation to compute income assigned to Idaho. Non-business income allocable to Idaho is added to the income apportioned to Idaho to arrive at Idaho taxable income.
