**Zoning Description** RE research district Intent. This district is designed for research facilities to serve the needs of commerce, industry, business and education. The prime characteristics of this district are the low intensity of land coverage by utilizing campus-like developments and preserving significant natural features, and the absence of nuisance factors such as excess noise, heat or glare, air pollution or waste water production. Permitted principal uses. Research, development, design, testing, technical training, and related activities for industrial, scientific, educational, and business enterprises. Laboratories for the research, development and testing of, including, but not limited to, medical, optical, dental and pharmaceutical products. Offices for the following occupations: executive, administrative, and professional, including engineering and engineering sales, but excluding medical and dental offices. Data processing and computer centers including computer programming and software development, training, and services and maintenance of electronic data processing equipment. Pilot manufacturing facilities for engineering, laboratory, scientific, electronic and research instruments and associated equipment. Printing, publishing, duplicating and photographic processing. Permitted accessory uses. Enclosed storage or maintenance buildings. Warehousing, storage, shipping and receiving of materials used on the premises. Required conditions. All uses established in the RE district must comply with the following requirements: Outdoor storage of equipment, goods, or materials shall be within an enclosed building or contained within an opaque, screened or fenced-in area. All ingress and egress shall be screened from residential zoning districts and no parking shall be allowed within a required open space that abuts a residential zoning district. No process carried on within the building shall cause noise discernible at the lot lines in excess of the average intensity of street and traffic noise at the lot lines, nor any production of heat, glare, dust, vibration, light, or odor discernible at the property lines. All hazardous materials, waste, and wastewater associated with use shall be handled and disposed of in a manner that is not dangerous to the health and safety of the abutting areas. The emissions of air pollution shall not be detrimental to the public welfare.
